SE 216 – SOFTWARE PROJECT MANAGEMENT
STAKEHOLDERS DOCUMENT

PROJECT NAME: NeuroMatter: Universal Local AI Hub

GROUP MEMBERS: Duru Deniz Alptekin, Şevval Acar, Kaan Efe Koygun, Ege Haktan Aykut, Ali Utku Aydın, Eren Karlı, Deren Kocabaş, Efe Berkay Soyucak

#	STAKEHOLDER	DESCRIPTION
1	**Project Owners**	People who provide vision and funding. Success brings financial profit and reputation; failure leads to significant financial loss.
2	**Primary Users**	People with sensory needs who benefit from a stress-free environment. Success provides a safe, private life; failure means continued stress and privacy risks
3	**Caregivers**	People who manage system settings and monitor resident safety. Success improves caregiving efficiency; failure causes higher safety risks and manual work.
4	**Product Development Team**	The engineers and designers responsible for building the software and hardware. Success builds strong professional reputation; failure results in loss of time and effort.
5	**Ministry of Health & NGO**	Organizations and specialists that provide advice for sensory needs. Success brings better tools for the community; failure means losing an effective support system.
6	**Financial Institutions**	Banks that manage the project's money and accounts. Success provides financial stability and profit; failure leads to financial risk and lost business.
7	**Insurance Companies**	Companies that support the project to reduce accidents. Success reduces insurance claims and improves efficiency; failure leads to more losses from accidents.
